

Fermentation

the ANAEROBIC system that does not require oxygen.

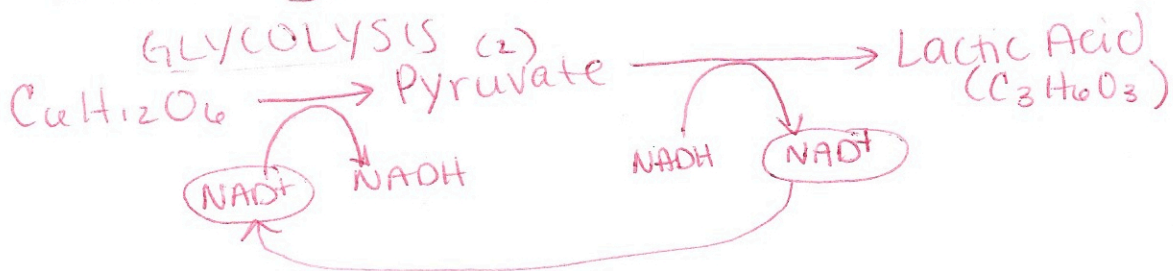

* Allows glycolysis to continue

- recycles NAD^+ to make NADH

① Lactic Acid Fermentation

- builds up lactic acid in MUSCLE that causes a burning feeling.

④ Alcoholic fermentation

- used by yeasts and some plants

* "fermentation" and "brew" come from the same origin which means "boil" or "bubble" from the gas that is released.

Glycolysis
